The Celpax Privacy Guarantee

As the provider of this service we take privacy seriously. From a technical point of view this device does not identify individuals; it's **only possible** for the device to report back that someone has pressed green or red.

Your company signed a privacy clause

We deliver Celpax devices under the promise that the company will respect the employee privacy. In the contract all companies agree to use our Celpax device to **improve working conditions** while maintaining the privacy of those pressing. The purpose is for everyone to start giving feedback in order to talk about what's good or not at work, and try to fix things that can be improved.

Surveillance is not permitted. It's not about controlling. This isn't about evaluating anyone. It's about changing things so people – **you** – feel better at work.

The Celpax Hotline

If you think that this device is not being used properly, have questions or general feedback, get in touch: support@celpax.com. We will act. We're a social venture on a mission to improve workplaces. If employees don't press green or red – we're failing our mission.
